

FEATURED BATHROOMS

PHOTO BY GREY STREET STUDIOS

Good Bones Fleshed Out

“My husband and I had just relocated and we bought a place that had good ‘bones’ but definitely needed updating and some custom solutions to make it work for us,” said this South Tampa homeowner. “I was really envisioning a brand new bathroom suite.” **West Coast Remodelers & Construction** made their vision come true. Custom shutters and tile floors were added, while gran-

ite-topped vanity cabinets and two 48-inch towers provide storage for bath products and linens. A beveled mirror flanked by two matching mirrored medicine cabinets is

centered over undermount sinks. The new heated Roman tub, with a chromatherapy option, is decked out with luxurious Rohl chrome fixtures and decorative tile. The

same tile—cut on a bevel at external corners—was also used for the shower and water closet while Italian glass tile was used as an accent throughout. The frameless glass shower is both functional and aesthetically pleasing.
