

KITCHEN REMODEL

GREY STREET STUDIOS

User-Friendly and Spacious

When the kitchen is the hub of the home, it needs to be attractive and user-friendly. **West Coast Remodelers** worked side-by-side with the owners of this Venetian Isles home to create a more open, attractive and functional kitchen with nearly double the storage space. To open up the room, the West Coast team removed existing soffits and installed ceiling-mounted upper cabinets throughout. The range was moved from a corner to another wall, which allowed for prep areas on both sides. A roomy new

floor-to-ceiling pantry unit was installed and the half wall supporting the raised bar was expanded into the home office area. That provided more counter space and increased storage in the new base cabinets. The owners opted for KraftMaid maple cabinets in a canvas finish topped with granite in creamy blue-gray tones. A vivid blue glass subway tile adds a jolt of color on the backsplash while recessed lighting, stainless steel appliances, a single-bowl sink and a contemporary Kohler faucet finish out the updated look.
